- O: Observe

The first step involves consciously halting any automatic response to anger. When feeling triggered, individuals are encouraged to pause and avoid reacting immediately. This moment of stopping interrupts the cycle of escalation and provides space for rational thought.

Practical tips:

Techniques include:

- Inhaling slowly through the nose for a count of four.
- Holding the breath for a count of four.
- Exhaling slowly through the mouth for a count of four.

3. Observe

This step involves paying attention to your thoughts, feelings, and physical sensations without judgment. Recognizing the signs of anger early allows for better regulation.

Questions to consider:

- What am I feeling right now?
- Where do I notice tension or heat in my body?
- What thoughts are running through my mind?

4. Proceed

After pausing to observe and calm, you can choose how to respond constructively. This might include communicating assertively, taking a break, or employing other coping strategies.

Understanding the STOP Method: Foundations of an Effective Anger Management Technique

What is the STOP Method?

The STOP method is a cognitive-behavioral technique designed to interrupt the automatic, often impulsive, reactions associated with anger.
